SNOWPLOWS

“Full Roll” Straight “J” Style Moldboard Models

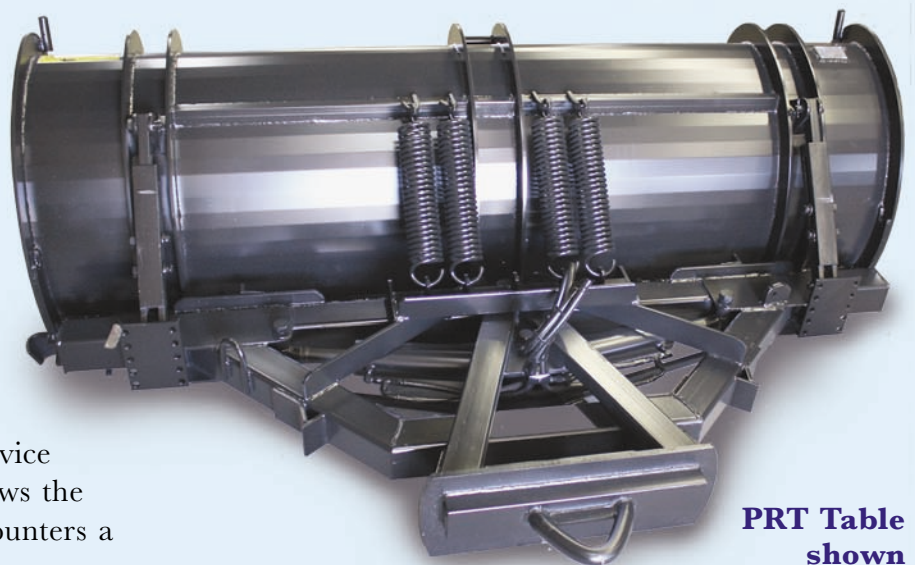

Gledhill “FULL ROLL” Straight Moldboard Reversible Plows are designed for an effective means of snow removal. Our proven construction method utilizes a paneled moldboard that provides additional rigidity and efficient snow breakage for ease of snow flow.

Moldboards are available in lengths of 10', 11', or 12'. Reversing Tables are available in three Power Reversible Models, either the 'PRT', 'PR2', or the 'PCL' Series. Also available is a Manual Reversible Model, the 'RH' Series.

Also standard is our automatic safety trip device that utilizes open extension springs which allows the moldboard to tilt forward when the plow encounters a solid obstruction.

Cast mushroom shoe assemblies are provided with each “FULL ROLL” moldboard reversible plow.
