“Jetstream™” Moldboard Reversible Models

The “Jetstream™” is the snow plow with the moldboard design that gives maximum throwing of snow in a single action with minimum truck power and plow wear. The “Jetstream™” is especially made for plowing to the right and to the left with symmetrically constructed, inverted, funnel-shaped ends for extreme distance of snow.

Moldboards are available in center heights of 36”, 42” or 50” and in lengths of 10’, 11’, or 12’. Reversing Tables are available in two power reversible models, either the ‘PRT’, or the “PCL” Series, and a manual reversible model, the “RH” Series.

Also standard is our automatic safety trip device that utilizes open extension springs which allows the moldboard to tilt forward when the plow encounters a solid obstruction. Cast mushroom shoe assemblies are provided with each Jetstream moldboard reversible plow.
