The Gledhill Straight Moldboard Reversible Snowplows are manufactured with an integral "Built-in Baffle". All of our moldboards are paneled for additional strength and easy flow of snow.

Our moldboards are available in uniform heights of 36", 42" or 48" and in lengths of 10', 11', or 12'. Any size moldboard can be combined with any of our various reversing tables. Reversing tables are available in five power reversible models, the 'PRT' series. "PR2" series, PCL series, PR4 series or PR5 series. A manual reversible model, the "RH" series is also available.

Also standard is our automatic safety trip device that utilizes open extension trip springs which allows the moldboard to tilt forward when the plow encounters a solid obstruction. Cast mushroom shoe assemblies are provided with each Straight Moldboard Reversible Plow.
